Solubility is Affected by pH. The pH of an aqueous solution can affect the solubility of the solute. By changing the pH of the solution, you can change the charge state of the solute. If the pH of the solution is such that a particular molecule carries no net electric charge, the solute often has minimal solubility and precipitates out of the ...

The Effect of pH on Solubility | Introduction to Chemistry

Solution. According to Henry's law, for an ideal solution the solubility, C g, of a gas (1.38 × 10⁻³ mol L⁻¹, in this case) is directly proportional to the pressure, P g, of the undissolved gas above the solution (101.3 kPa, or 760 torr, in this case).

11.3: Solubility - Chemistry LibreTexts

Solubility, degree to which a substance dissolves in a solvent to make a solution (usually expressed as grams of solute per litre of solvent). Solubility of one fluid (liquid or gas) in another may be complete (totally miscible; e.g., methanol and water) or partial (oil and water dissolve only slightly).In general, "like dissolves like" (e.g., aromatic hydrocarbons dissolve in each other ...

Solubility | chemistry | Britannica

Solubility is the property of a solid, liquid or gaseous chemical substance called solute to dissolve in a solid, liquid or gaseous solvent.The solubility of a substance fundamentally depends on the physical and chemical properties of the solute and solvent as well as on temperature, pressure and presence of other chemicals (including changes to the pH) of the solution.

The solubility of the oxysulfate is given in the form of a plot of the basicity and MgSO 4 content of magnesium sulfate solutions. The heat of solution of the oxysulfate compound in HCl:26.61H 2 O (2.000 normal at 25 °C) is 68.94 kcal/mole with a standard deviation of 0.23 kcal/mole and its heat of formation from Mg(OH) 2 , MgSO 4 ·7H 2 O ...

Thus, the following solubility equation was obtained by fitting to the solubility data (from Table 2) for LaBr 3 ·7H 2 O in the temperature range 298–389.6 K: 5 In other systems, the corresponding solubility data were either not reliable (as for the YBr 3 ·H 2 O) or a considerable part of the data related to different equilibrium phases ...
