A practitioner's guide to working dog welfare. Abstract Research conducted by the Anthrozoology Institute and the Defence Science and Technology Laboratory has shown that many working dogs exhibit high levels of physiologic stress in response to kenneling (Hiby et al., 2006; Rooney et al., 2007a). Furthermore, these dogs tend to perform poorly during training, establishing links between welfare and working ability (Rooney et al., 2005, 2007b).

After years of lobbying by nurse practitioners in California, a bill allowing them to practice without being under medical practitioners' supervision was signed into law on 29 September. The law will come into effect in 2023. Under the new legislation, nurse practitioners will join those in 40 other US states, which allow for either full or partial autonomous practice.
