Suffering with psoriasis and psoriatic arthritis, I began the Keystone approach with the approval of my rheumatologist. I must admit I feel much better. It has been 7 months and I feel that I am in remission. It is a difficult diet to maintain but the difference in pain and discomfort makes it worth it. I have no plans to change from this program.

IFPA is a nonprofit organisation comprising psoriasis associations from around the world. IFPA unites psoriasis associations so that their global campaign for improved medical care, greater public understanding and increased research will improve the lives of people who live with psoriasis and psoriatic arthritis.

### About - Global Psoriasis Atlas

Psoriatic arthritis is a form of arthritis that affects some people who have psoriasis — a condition that features red patches of skin topped with silvery scales. Most people develop psoriasis first and are later diagnosed with psoriatic arthritis, but the joint problems can sometimes begin before skin patches appear.
