Turn the Networker ON and press the Auto button until 'Manual' appears near the bottom left-hand corner of the screen. The Set Temperature will now appear at the top of the screen with the current room temperature still visible in the top right of the screen.

Using the Networker - McKinnon Heating
I have finally(took a while to find some one) replaced my Brivis manual heating thermostat with NEST recently. It's working perfectly. I have a separate Brivis Contour evaporative cooling system that's controlled by a Brivis network controller. My question is, is it possible to control both heating and cooling from my Nest thermostat?
