Toyota Avensis replaced Carina in 1997. The production of first-generation cars continued until 2003. Avensis had versions with sedan, hatchback and station wagon bodies (which in the Japanese market was a separate Caldina model). For the car, there were three gasoline engines 1.6, 1.8 and 2.0, as well as a two-liter turbodiesel.

### TOYOTA AVENSIS Wiring Diagrams - Car Electrical Wiring Diagram

An innovative engine set-up in the Avensis features a Variable Valve Timing system from Toyota, acting to optimize the timing for the intake valve operations depending on conditions. This means the optimum level of power is used at all times and fuel economy and emissions are lowered.

Hatchback, Saloon & Estate. Does NOT cover Verso or new range introduced January 2003. Petrol: 1.6 litre (1587cc & 1598cc), 1.8 litre (1762cc & 1794cc) & 2.0 litre (1998cc).

\* Includes legal, political and financial changes for 2003

This pocket-sized, illustrated guide covers every significant make and model of car sold in Europe and North America during the 2006-2007 model year, from giants like Ford and VW to small-scale manufacturers such as Morgan and Noble. Each model is pictured in color, with a data table providing vital statistics to enable comparisons between models. Providing full details for over 700 cars and stretching to 400 pages, this is a must-have reference source and a useful "spotter's guide" for all car enthusiasts.

This volume constitutes the proceedings of the Fourth International Conference on Flexible Query Answering Systems, FQAS'2000, held in Warsaw, Poland on October 25 - 28, 2000. The FQAS conference has been the premier conference focusing on one of key issues that the information society

faces, namely that of providing easy, flexible, intuitive access to information for everybody. In targeting this issue, the conference draws on several research areas, such as databases, querying, information retrieval, knowledge representation, soft computing, cyberspace, multimedia systems, human-computer interaction, etc. FQAS'2000 has been preceded by the extremely successful FQAS'94, FQAS'96 and FQAS'98 conferences all held in Roskilde, Denmark. The present conference provides a unique opportunity for researchers, developers and practitioners to explore new ideas and approaches in a multidisciplinary forum. As a metaphor for flexible query answering we may consider a human intermediary who has expertise in the topic of the query, and is experienced in identifying the user's information needs and answering the needs from the available information resources. The use of knowledge on relevant contexts, available information resources, etc. , enables the expert to respond rather precisely to the needs, though the query, per se, may be imprecise, incomplete, etc. Thus, a key issue for flexible query answering system is to obtain, maintain, represent, and utilize such knowledge. This comprises domain knowledge and metaknowledge, its representation and organization in ontologies, terminologies, etc.
