I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

This critical edition provides unique access to a work which has challenged scholars and students alike. The book is the first to deal fully with the poem as literature and to supply the runic background necessary for an understanding of the raw materials with which the poet was working. The introduction offers a thorough discussion of the origin, development, and uses of runes before proceeding to the close examination of text, language, literary sources, style, and themes of the poem. Following the text and translation of the poem proper, detailed explanatory notes pay particular attention to the background of each individual rune and rune name, and the appendixes provide analogous material to assist in setting the poet's achievement into the runic context. Since many of the sources necessary for an accurate assessment of the Old English Rune Poem are written in foreign or dead languages, modern English translations have been provided throughout to ensure that the poem will be accessible to students as well as to professional medievalists. With Contributions FromChelvin Sng (National University Health System, Singapore) & Laurence Lim (Singapore National Eye Centre, Singapore) Many new treatments and diagnostic procedures in ophthalmology have been refined or newly developed during the past four years, a new edition reflecting these changes is most timely. The scope and aim of the book will be consistent with the first edition, which provides a broad review of the specialist ophthalmology examinations for final year ophthalmology residents and trainees. The book deals primarily with key facts and topics that are important from the examination perspective. Only information and facts that are considered relevant and critical to the exams are covered, with topics that may be of scientific interest, but are not commonly tested in exams, specifically left out. Time-challenged readers will also benefit from the knowledge acquired from various other sources or textbooks that are now organized and synthesized in this book. While not meant to replace the standard textbooks, enough information is contained within the book to serve as the main revision text nearer the exams. The style and format of this book is intentionally didactic, with questions and short answers. The answer includes a "model opening statement," followed first by a classification system to aid organization of facts, and then the core explanation in concise short notes. "Exam Tips" are inserted to provide an insight into techniques of answering different types of questions and when appropriate, a "Clinical Approach" section is also included. In the new edition, topics such as new understanding of disease mechanisms (e.g., genetics of eye diseases), new investigations (e.g., OCT), and novel procedures and treatment (e.g., the use of antivascular endothelial growth factors, new refractive surgical techniques) are covered. This book will be a valuable guide to the final year ophthalmology residents and trainees taking the specialist ophthalmology examinations, particularly for exams with a strong oral or viva component. Although primarily aimed at candidates attempting the British postgraduate exams (FRCS, FRANZCO, MRCS, MRCOphth and FRCOphth), it is also useful for other examination systems (e.g., the American Boards). Many junior residents, in fact, find the information handy during grand rounds.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

In the tradition of Mary Roach's bestselling Stiff and Jessica Mitford's classic exposé The American Way of Death comes this meticulously researched, refreshingly irreverent, and lavishly illustrated look at death from acclaimed author Harold Schechter. With his trademark fearlessness and bracing sense of humor, Schechter digs deep into a wealth of sources to unearth a treasure trove of surprising facts, amusing anecdotes, practical information, and timeless wisdom about that undiscovered country to which we will all one day travel. Topics include • Death anxiety—is your fear of death normal or off the scale? • You can't take it with you . . . or can you? Wacky wills and bizarre bequests • The hospice experience—going out in comfort and style • Deathbed and funeral etiquette—how to help the dying and mourn the dead with dignity • Death on demand—why the right-to-die movement may be the next big thing • "Good-bye everybody"—famous last words • The embalmer's art—all dressed up and nowhere to go • Behind the scenes at your local funeral home • Alternative burial choices—from coral reefs to outer space From the cold, hard facts of death to lessons in the art of dying well, from what happens in the body's last living moments to what transpires in the ground or in the furnace, from near-death experiences to speculation on the afterlife, The Whole Death Catalog leaves no gravestone unturned.

This volume of essays contains contributions from a very wide range of British, American and Spanish scholars. Its primary concern is the relationships between the various ethnic, cultural, regional and religious communities that co-existed in the Iberian peninsula in the later Middle Ages. Conflicts and mutual interactions between them are here explored in a range of both historical and literary studies, to expose something of the rich diversity of the cultural life of later medieval Spain.
