Severo Sarduy never enjoyed the same level of notoriety as did other Latin American writers like Garc í a M á rquez and Vargas-Llosa, and his compatriot, Cabrera-Infante. On the other hand, he never lacked for excellent critical interpretations of his work from critics like Roberto Gonz á lez Echevarr í a, Ren é Prieto, Gustavo Guerrero, and other reputable scholars. Missing, however, from what is otherwise an impressive body of critical commentary, is a study of the

importance of painting and architecture, firstly, to his theory, and secondly, to his creative work. In order to fill this lacuna in Sarduy studies, Rolando P é rez's book undertakes a critical approach to Sarduy's essays—Barroco, Escrito sobre un cuerpo, "Barroco y neobarroco," and La simulaci ó n—from the stand point of art history. Often overlooked in Sarduy studies is the fact that the twenty-three-year-old Sarduy left Cuba for Paris in 1961 to study not literature but art history, earning the equivalent of a Master's Degree from the É cole du Louvre with a thesis on Roman art. And yet it was the art of the Italian Renaissance (e.g., the paintings as well as the brilliant and numerous treatises on linear perspective produced from the 15th to the 16th century) and what Sarduy called the Italian, Spanish, and colonial Baroque or "neo-baroque" visually based aesthetic that

Interested him and to which he dedicated so many pages. In short, no book on Sarduy until now has traced the multifaceted art historical background that informed the work of this challenging and exciting writer. And though Severo Sarduy and the Neo-Baroque Image of Thought in the Visual Arts is far from being an introduction, it will be a book that many a critic of Sarduy and the Latin American "baroque" will consult in years to come.

LARAMIE was a fan favorite for four years on TV, airing over 120 episodes. Starring John Smith as Slim Sherman, Robert Fuller as Jess Harper, Hoagy Carmichael as Jonesy and Robert L. Crawford, Jr., as Andy Sherman, it brought a higher level of quality to the small screen western. The comic series only lasted four issues, but it, too, is some of the best western comics of the era. We

Invited to answer questions about his relationship to Judaism, Jacques Derrida spoke through Franz Kafka: As for myself, I could imagine another Abraham. From the experience of a summons that surprises us and prompts the query Who, me? Derrida explores the movement between growing up Jewish, becoming Jewish, and Jewish being or existence. His essay *The Other Abraham* appears here in English for the first time. We no longer confront Judaism but judeity, multiple Judaisms and Jewishnesses, manifold ways of being and writing as a Jew-in Derrida's case, as a French-speaking Algerian deprived of, then restored to French nationality in the 1940s. What is it to be a Jew and a philosopher? How has the

notion of Jewish identity been written into and across Jewish literature, Jewish thought, and Jewish languages? Here distinguished scholars address these questions, contrasting Derrida's thought with philosophical predecessors such as Rosenzweig, Levinas, Celan, and Scholem, and tracing confluences between deconstruction and Kabbalah. Derrida's relationship to the universalist aspirations in contemporary theology is also discussed, and his late autobiographical writings are evaluated. This multifaceted volume aims to open the question of Jewishness, above all, to hold it open as a question, though not one of practical or theoretical identity. As much a contestation of identity as a profound reflection on what it means today to seek, elude, and finally to wrestle with the significance of being-jew, *Judeities* invites us to revisit the human condition in the twenty-first century.

Winner of the John Templeton Award for Theological Promise, 2009 This book argues that the Christian doctrine of creatio ex nihilo (creation out of nothing) sets up a support system for a "logic of domination" toward human and earth others. Conceptually inspired by the work of theologian Catherine Keller and feminist philosopher of the environment Val Plumwood, it follows a genealogical method in examining how the concept of creation out of nothing materializes in the world throughout different periods in the history of the Christian West.
