do while watching movies that incorporate certain colors. Guided by her twenty-five years of research on the effects of color on behavior, Bellantoni has grouped more than 60 films under the spheres of influence of six major colors, each of which triggers very specific emotional states. For example, the author explains that films with a dominant red influence have themes and characters that are powerful, lusty, defiant, anxious, angry, or romantic and discusses specific films as examples. She explores each film, describing how, why, and where a color influences emotions, both in the characters on screen and in the audience. Each color section begins with an illustrated Home Page that includes examples, anecdotes, and tips for using or avoiding that particular color. Conversations with the author's colleagues--including award-winning production designers Henry Bumstead (Unforgiven) and Wynn Thomas (Malcolm X) and renowned cinematographers Roger Deakins (The Shawshank Redemption) and Edward Lachman (Far From Heaven)--reveal how color is often used to communicate what is not said. Bellantoni uses her research and experience to demonstrate how powerful color can be and to increase readers awareness of the colors around us and how they make us feel, act, and react. *Learn how your choice of color can influence an audience's moods, attitudes, reactions, and interpretations of your movie's plot *See your favorite films in a new light as the author points out

Color is one of cinema's most alluring formal systems, building on a range of artistic traditions that orchestrate visual cues to tell stories, stage ideas, and elicit feelings. But what if color is not—or not only—a formal system, but instead a linguistic effect, emerging from the slipstream of our talk and embodiment in a world? This book develops a compelling framework from which to understand the mobility of color in art and mind, where color impressions are seen through, and even governed by, patterns of ordinary language use, schemata, memories, and narrative. Edward Branigan draws on the work of Ludwig Wittgenstein and other philosophers who struggle valiantly with problems of color aesthetics, contemporary theories of film and narrative, and art-historical models of analysis. Examples of a variety of media, from American pop art to contemporary European cinema, illustrate a theory based on a spectator's present-time tracking of temporal patterns that are firmly entwined
