Gender-based violence is a multi-faceted public health problem with numerous consequences for an individual ' s physical and mental health and wellbeing.

This collection develops a comprehensive public health approach for working with gender-

based violence, paying specific attention to international budgets, policies and practice and drawing on a wide selection of empirical studies. Divided into two parts, the text looks at how public health budgets and policies can be used to influence a range of risk factors and outcomes, and then outlines a theoretical and

conceptual framework. The second section draws on empirical studies to illustrate ways of managing the risks and impacts of, and responses to, the problem. It concludes by summarising those risk factors that can be effectively addressed through appropriately budgeted public health programmes globally.
