A new look at maths without the Boring Bits . . . How many trillions are there in a googol? Which fractions are vulgar? What famous mathematician refused to eat beans? And which one never travelled without his pet spider in an ivory box? Mathematical theorems and equations are inextricably entangled with the great, and often eccentric thinkers who made breakthrough discoveries. Teacher and numbers expert Liz Strachan takes readers beyond the classroom, combining anecdotes, proofs and party tricks to reveal the foundations of algebra, geometry and trigonometry in a clear and entertaining style. From the Difference Engine to magic squares and from the Fibonacci rabbits to Fermat's Last Theorem, this fascinating tour of the weird world of numbers, imaginary, real or infinite, will appeal to anyone with an enquiring mind.

Use the simple practices in this book to activate healing, alleviate aches and pains, and become the healthy person you're meant to be.

1820: the landscape of England is undergoing sweeping change as the country pioneers the steam-driven machine age. The Morlands, too, face change: Cousin Africa returns from St Helena to startle society with her unconventional ideas; Lucy brings her sons home from their Grand Tour, brimming with ideas for their future. In Manchester, Sophie and Jasper meet fierce opposition to their plans for re-housing the factory hands; while in London, Rosamund enters a bizarre agreement with her husband Marcus, with bitter consequences. And at Morland Place, James and Heloise watch their two sons approaching manhood. Benedict delights equally in love and locomotives, while Nicholas, the heir develops a taste for more unusual pleasures- and an impatience to claim his inheritance.

This is a problem almost all practising psychoanalysts will face at some time in their career, yet there is very little in the existing literature which offers guidance in this important area. On Bearing Unbearable States of Mind provides clear guidance on how the analyst can encourage the patient to communicate the quality of their often intolerably painful states of mind, and how he/she can interpret these states, using them as a basis for insight and psychic change in the patient. Employing extensive and detailed clinical examples, and addressing important areas of Kleinian theory, the author examines

the problems that underlie severe pathology, and shows how meaningful analytic work can take place, even with very disturbed patients. *On Bearing Unbearable States of Mind* will be a useful and practical guide for psychoanalysts and psychotherapists, and all those working in psychological settings with severely disturbed patients.

“Outside of her remarkable poems, we know next to nothing about Yu Xuanji,” David Young writes. “She was born in 844 and died in 868, at the age of twenty-four, condemned to death for the murder of her maid...We owe the survival of her forty-nine poems to the ancient Chinese anthologists’ urge to be complete.” The poems gathered in this bilingual (Chinese/English) edition will be read again and again for their beauty. The works preserve Yu Xuanji’s passion, her sharp eye for detail, her often witty variations on familiar Chinese themes, all of which give the poems an immediacy one rarely finds in ancient, translated texts. Poems addressed to Yu Xuanji’s husband and to other men (some famous poets) and women give us some sense of her relationships; the book also includes other traditional Chinese forms

such as meditations on landscapes and occasional poems commemorating feast days. As noted in the introduction, the poetry also provokes us to think about the act of writing, about the culture and politics of the T'ang Dynasty, and about gender.
