Or is human nature entirely selfish? In this eloquent and accessible book, famed biologist David Sloan Wilson provides new answers to this age-old question based on the latest developments in evolutionary science. From an evolutionary viewpoint, Wilson argues, altruism is inextricably linked to the functional organization of groups. "Groups that work" undeniably exist in nature and human society, although special conditions are required for their evolution.

From an evolutionary viewpoint, Wilson argues, altruism is inextricably linked to the functional organization of groups. Humans are one of the most groupish species on earth, in some ways comparable to social insect colonies and multi-cellular organisms. The case that altruism evolves in all social species is surprisingly simple to make.
