## **CONNECTIONS: A SE CONDARY MATHEMA TICS CORE CURRICULUM**

If explicit connections exist between the content of real analysis and high school mathematics, it is essential that those who teach calculus, precalculus, and algebra have a firm understanding of this subject (Wasserman et al., 2017).

As another example of the connection between abstract algebra and secondary mathematics, we consider the problem of multiplying two polynomials. (See Baldinger [2013, 2014] for additional examples of this type.) In high school, students learn that the degree of the product of two nonzero polynomials is the sum
